- **UI Designer & Graphics (BIBA, Bremer Institut für Produktion und Logistik GmbH)**

Interface&Interaction Hight Accelerated Life Test (HALT) Profile aims a qualitative step testing methodology carried out to identify the design flaw and operating limits in the Printed Circuit Boards (PCB) design against the motion stresses through the methodology where pre-recorded real test profile data is provided as an input to HALT for stress screening, (HALT) website

Interface&Interaction for a holistic, innovative framework for the design, development and orchestration of 5G-ready application and network service sliced over slices programmable infrastructure, (MATILDA) website

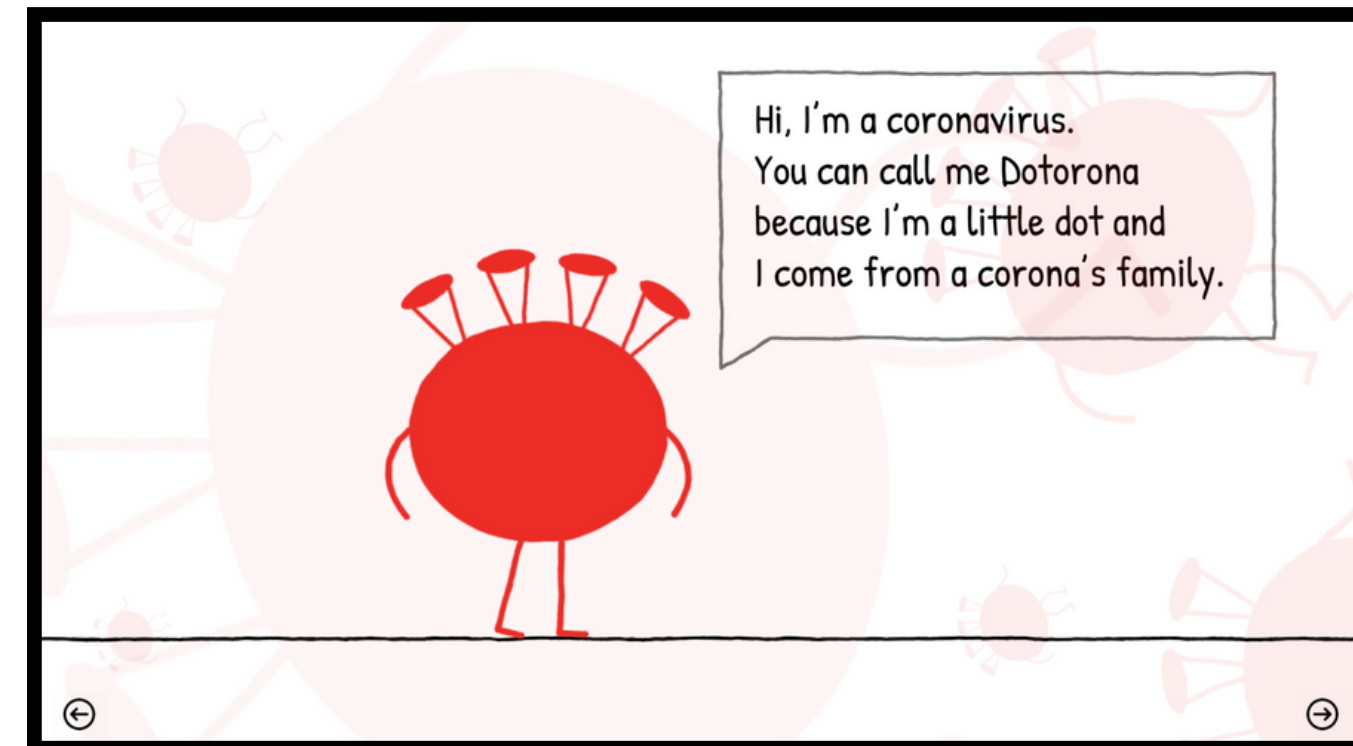

Brochure/Invitation letter Design for ForeSee, a European Cluster of six innovative R&D projects - PRECOM, PROGRAMS, PROPHECY, SERENA, UPTIME, Z-BRE4K - for sustainable Predictive Maintenance solutions, is organising a series of webinars from September to November 2020.

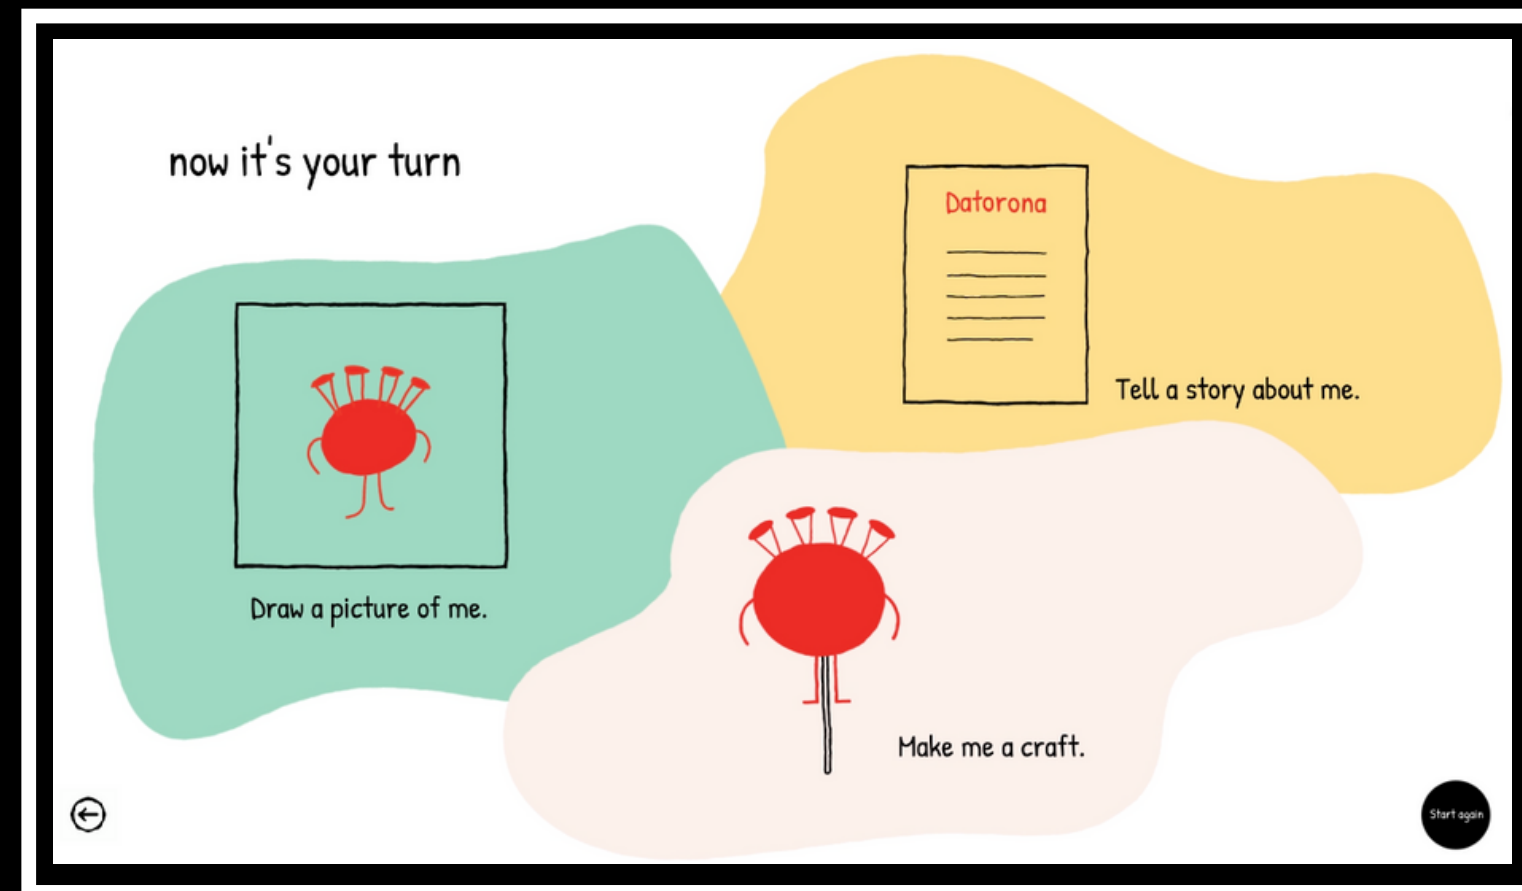

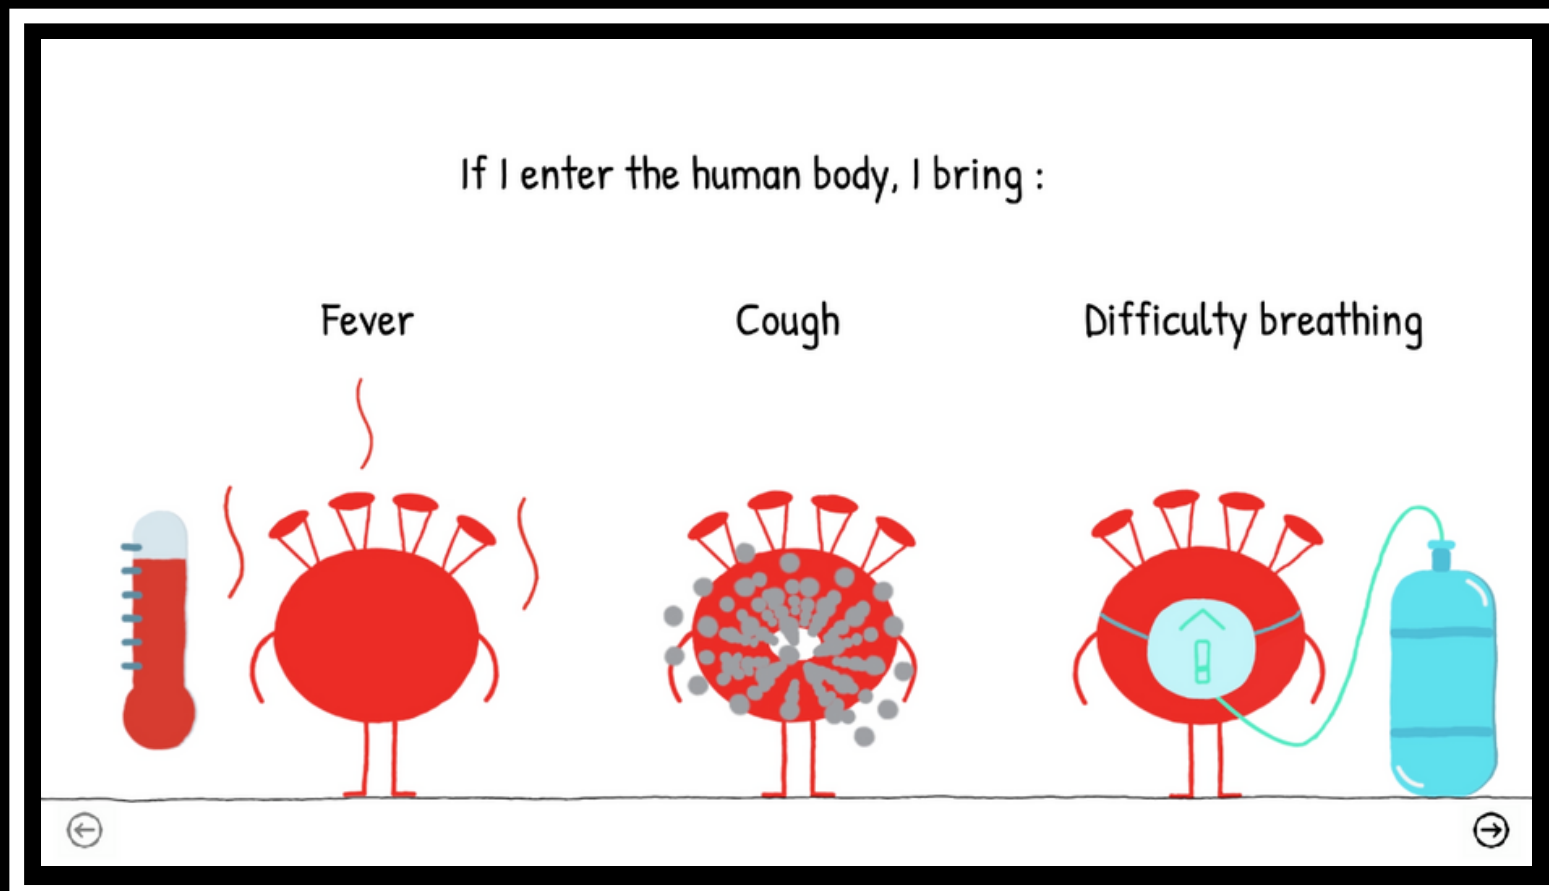

PROJECTS

DOTORONA

Prototype book for kids (about Coronavirus (COVID-19)).

DotoronaPrototype book for kids (about Coronavirus (COVID-19))Children play an important role in society. They are struggling with their fears and anxieties these days because they have no idea about viruses and recent happens. To make it easier these days, we can let them know. The best way is to tell a story. Prototype book tells a story with animations.

There is some Interaction for more entertainment and understandable for kids. In my opinion, this method not only helps children to better understand the situation but also leads to the formation of a relationship and cooperation with parents. This book has the main character call Dotorona.

Summer 2020

Prof. Tanja Diezmann

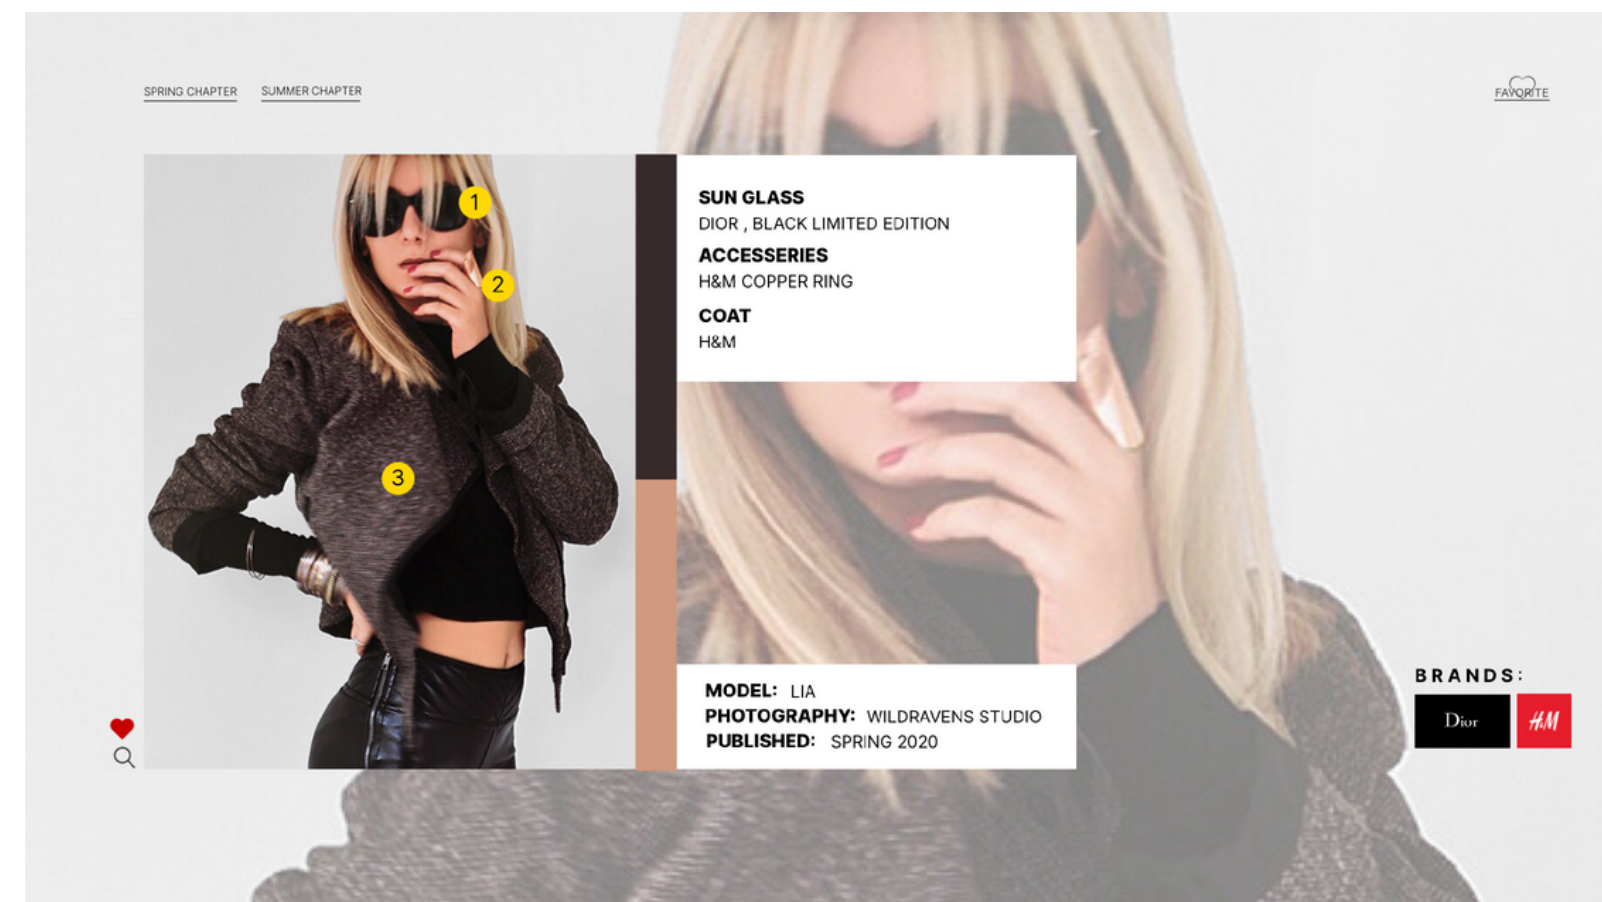

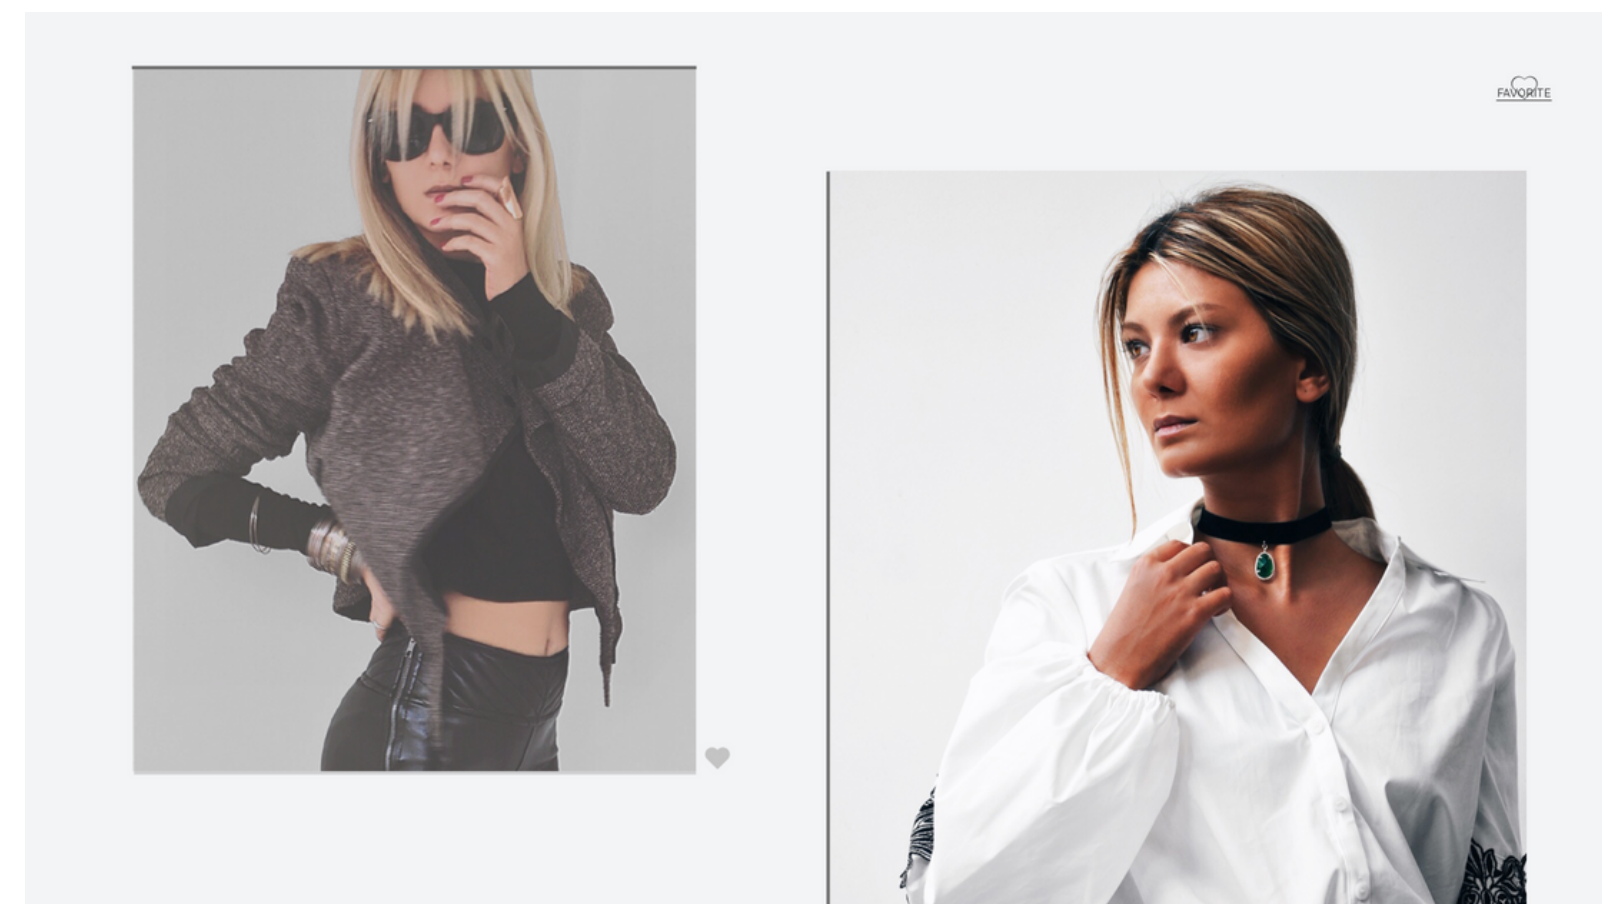

University of the Arts Bremen (Hochschule für Künste Bremen)

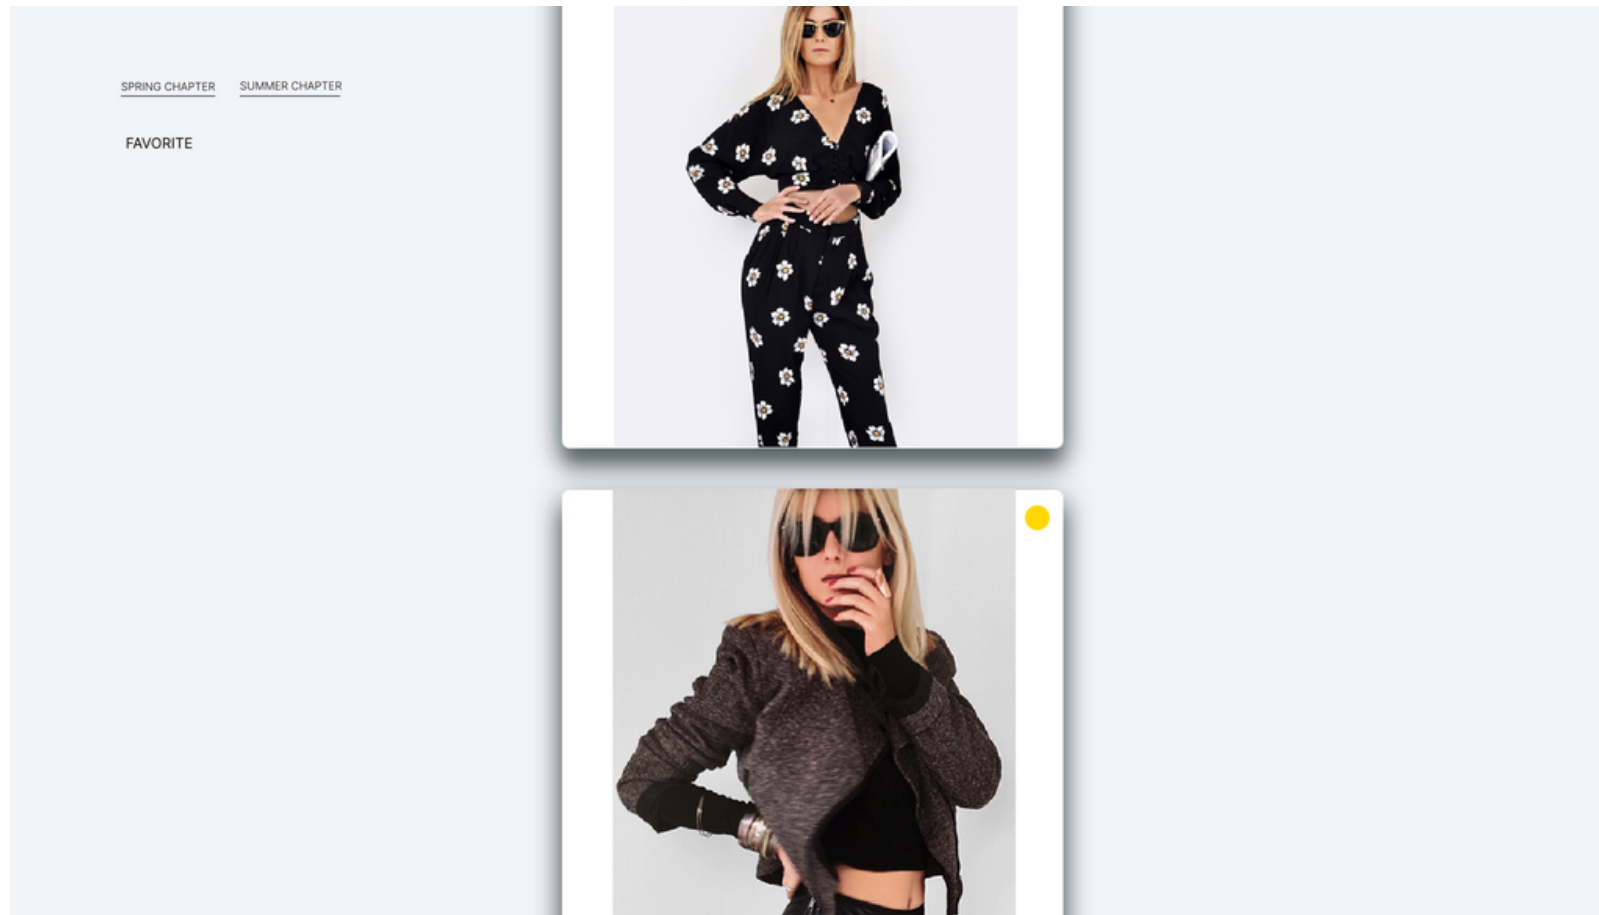

UI & UX Design for trend fashion by LIA.

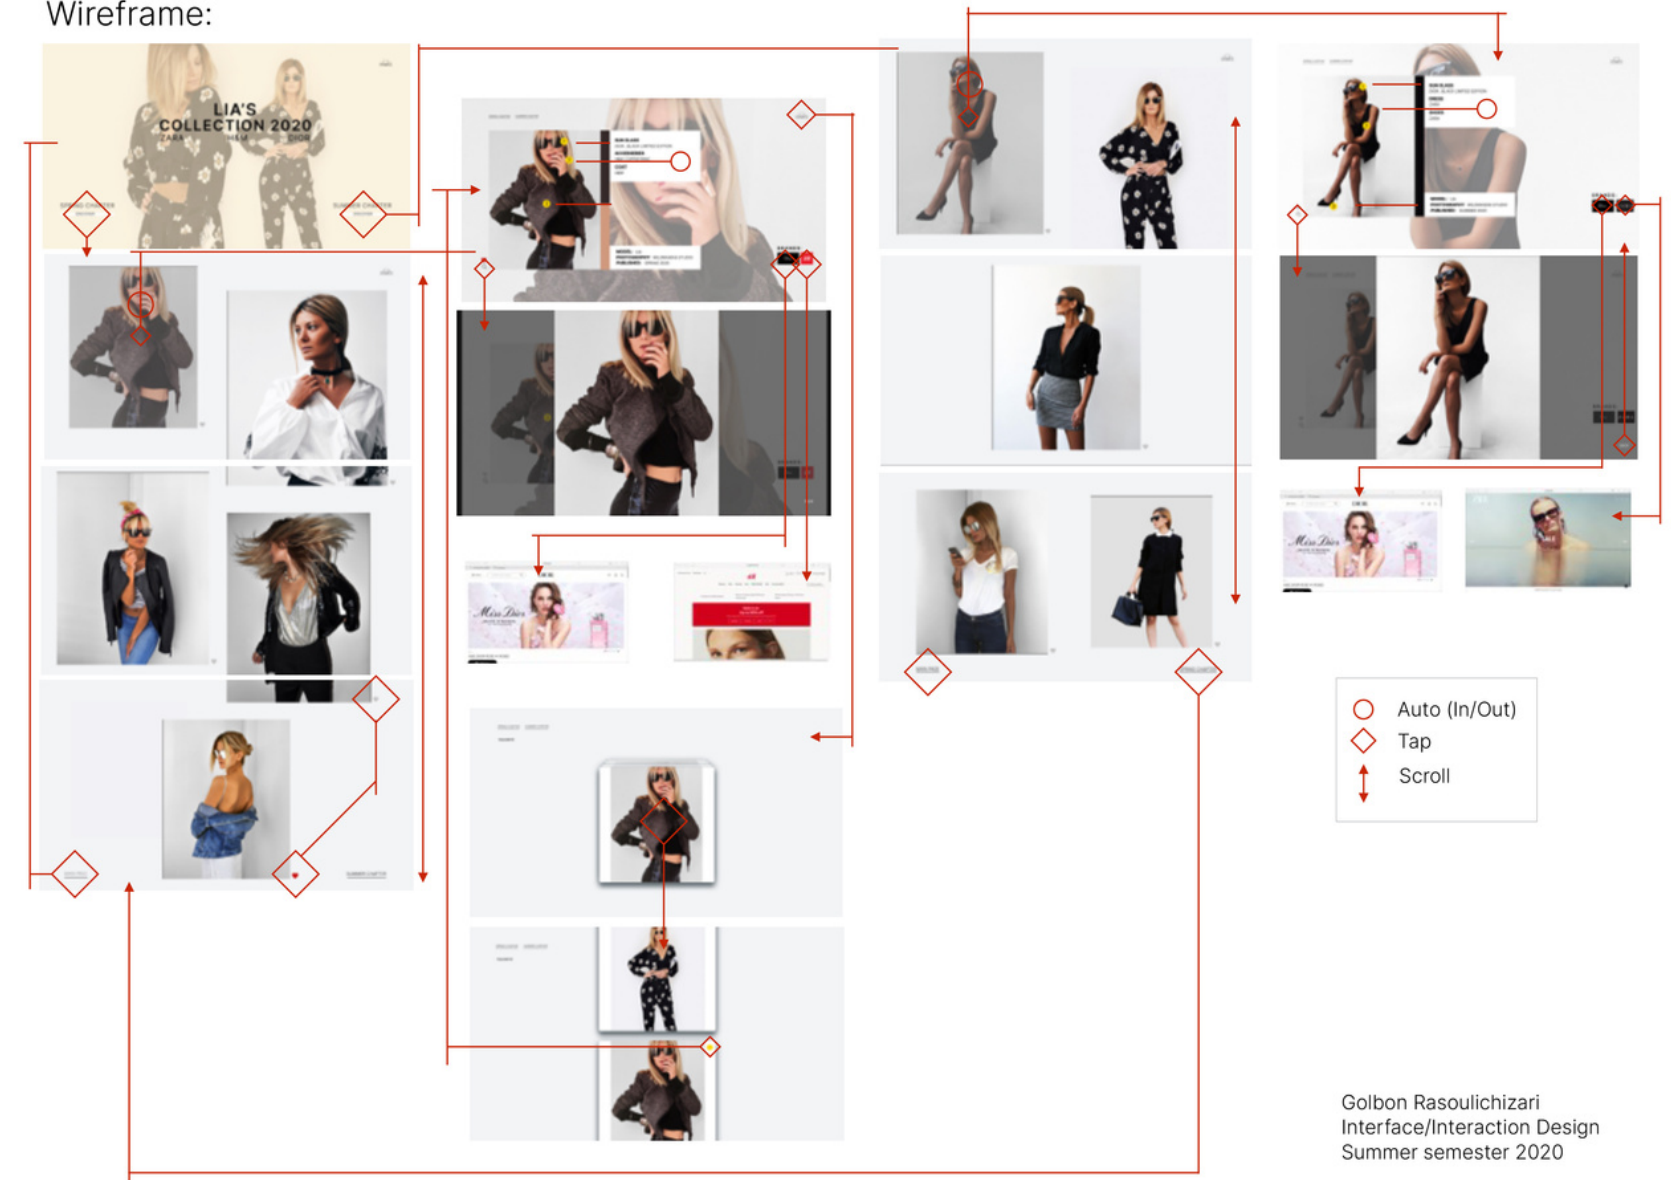

The website is showing images and information about style/fashion. Lia (Model) represents trend collection of spring and summer 2020 for ZARA, H&M, DIOR.

For web face users (who interests to follow fashion blogs and trends.)

Wireframe:

Features:

- Spring chapter / Summer chapter
- Choose your favorite of her
- Trend color in style
- Awareness of product details
- Zoom
- Directly go through the brands website

Summer 2020

Prof. Peter von Maydell

University of the Arts Bremen (Hochschule für Künste Bremen)

Alternative album cover Processing

By using Random walk algorithm property make an alternative band album cover..Allows you to create a new, unpredictable image each time the code is read.

This way you can create an infinite number of images.

The random walker algorithm is an algorithm for image segmentation. ... The image is modeled as a graph, in which each pixel corresponds to a node which is connected to neighboring pixels by edges, and the edges are weighted to reflect the similarity between the pixels.

```
Random_Walker
1
2 int x;
3 int y;
4 void setup() {
5   size(400, 400);
6   x = 200;
7   y = 200;
8   background(#EA8500);
9 }
10 void draw() {
11   stroke(100, 200);
12   strokeWeight(5);
13   point(x, y);
14
15
16   int r = int(random(10));
17
18   switch (r) {
19     case 0:
20       x = x + 7;
21       break;
22     case 1:
23       x = x - 7;
24       break;
25     case 2:
26       y = y + 7;
27       break;
28     case 3:
29       y = y - 7;
30       break;
31   }
```
